

Hello,

I am writing to voice my vehement opposition to H.B. 6355. This bill allows government to strip the people of their constitutional rights without due process. This does not provide the accused with a presumption of innocence, and forces the accused to petition the government to reinstate their inalienable rights after the fact. The process is antithetical to the foundation of our criminal justice system. Enforce laws that already exist and prosecute those who are forbidden from owning a firearm yet try to purchase and are denied.

Signed,

Brian A Ostrowski
